

MRX Specialty Controls

- ▶ Excellent stability
- ▶ Wide array of parameters
- ▶ "All in one" saves time and cost

MRX Specialty Controls feature a high stability together with the advantage of including many parameters in one control. As several parameters are included in the same control, one MRX Specialty Control can replace several competitive

products. This will not only reduce cost and work-time but will also unify the quality assessment program for laboratories. The Specialty Controls are suitable for the specialty laboratory and are available in normal and abnormal levels.
