

MRX PT Quick

- ▶ High sensitivity, ISI ~1
- ▶ Calibrated against WHO international reference preparation RBT/05
- ▶ Excellent stability
- ▶ Single vial, lyophilised reagent

MRX PT Quick is commonly used for determination of PT in patients who are administered vitamin K-antagonists, and for detection of deficiencies within the extrinsic and common pathways of the coagulation cascade. MRX PT Quick reagent is easy to reconstitute, and calcium is already added to the reagent before lyophilisation. MRX

PT Quick is a single vial product calibrated against the WHO international preparation of thromboplastin RBT/05, which is traceable to the first reference preparation of thromboplastins. The calibration assures low lot-to-lot variation and consequently results in reliable PT determination.

DETAILS

Product form	Lyophilised
Wavelength	For instrument specific settings, consult instrument applications.

ANALYTICAL PERFORMANCE CHARACTERISTICS

ACL TOP 700 CTS has been used for these measurements.

	Sample	Repeatability	
		Mean PT (s)	CV%
Precision	Level 1	13.7	0.7
	Level 2	29.4	2.0
	<ul style="list-style-type: none"> ▶ Bilirubin <40 mg/dL ▶ Haemoglobin <500 mg/dL ▶ Unfractionated heparin <200 U/dL ▶ Triglycerides <500 mg/dL 		
No interference with			

STABILITY AND STORAGE

Storage	2–8 °C
Shelf-life	24 months at 2–8 °C
After reconstitution	5 days at 2–25 °C
